## SUMMARY

Full-stack engineer with 1+ year of production experience building and shipping scalable React.js, Next.js + TypeScript applications with Node.js / Express / MongoDB backends.

## EXPERIENCE

**SDE 1 at Logipod** *July 2026 – Present*

- Working on Sharkship, an internal product, owning the customer-facing panel — contributed UI improvements including shipping label customisation features using React.js.
- Actively building and learning AI agent development as part of the team's AI initiatives, implementing agentic workflows in production.

**SDE 1 at Kazam EV Tech** *September 2025 – June 2026*

- Built and shipped 15+ production pages for the B2C EV charging platform using Next.js, React.js and TypeScript, driving 6.8K+ monthly visitors and 10.3K+ page views with steady 10% month-over-month growth.
- Created and connected REST APIs (Express.js, MongoDB) with the frontend to power charger discovery and session management.
- Owned the website's SEO from scratch — added dynamic meta tags, structured data, and SSR, taking the site from zero search visibility to ranking on target keywords within 3 months.
- Integrated an AI-powered chatbot into the platform, building the entire frontend interface including conversation UI, real-time message streaming, and state management using Next.js + TypeScript.
- Fixed 50+ production bugs and shipped updates weekly, working closely with product and backend teams.

**Programmer Analyst at Cognizant** *May 2025 – August 2025*

- Developed and optimized low-latency software modules adhering to OOP principles using Java.
- Built automated API test suites (Postman, Selenium) covering 30+ endpoints, reducing manual QA effort by ~20 hours/sprint and catching regressions pre-deployment.

**Machine Learning Intern at IRDE-DRDO** | Certificate *May 2024 - June 2024*

- Developed a real-time object detection system using YOLO models, training on a dataset of 1200+ images and achieving 92% mAP with YOLOv5s and 75.2% mAP with YOLOv8s.

## SKILLS

**Languages:** JavaScript, TypeScript, C, C++

**Frontend:** Next.js, React.js, Redux Toolkit, Context API, Tailwind CSS, Animation, Framer Motion, HTML5, CSS3

**Backend & Database:** Node.js, Express.js, REST APIs, MongoDB, SQL

**Tools:** Git, GitHub, Postman, VS Code

**CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

## PROJECTS

**Kazam EV Tech Website -** Live *October 2025 - Present*

*Next.js, React.js, TypeScript, Tailwind CSS, Node.js, Framer Motion*

- Owned design and development of 15+ Product pages (Careers, About Us, LEVDC Pro, Zip, Zoom, Zap Pro, CMS, BSMS, RMS, Energy Intelligence, Roaming, Revenue Management, Charger Health Checkup) and key Solution pages.
- Also built the **Kazam Solution Finder**, a multi-step interactive quiz that routes visitors to the right product based on use-case (CPO, fleet, leasing, energy management), reducing sales-team triage on inbound leads.
- Designed a unified form-overlay system integrated with HubSpot across product and solution pages.

**SaaS Landing Page – Animated** Code | Live *August 2025*

*HTML5, Tailwind CSS, TypeScript, Next.js, Framer Motion, GSAP*

- Developed a fully responsive SaaS landing page (Next.js 14, Framer Motion) with parallax animations, achieving 95+ Lighthouse score.

**MOMATO – Restaurant Discovery App** Code | Live *Nov 2024*

*HTML5, Tailwind CSS, JavaScript, React.js*

- Developed a responsive frontend enabling restaurant discovery and real-time menu search using Swiggy API.

## EDUCATION

**Madan Mohan Malaviya University of Technology** *Oct 2021 – May 2025*

B.Tech – Electronics and Communication Engineering, CGPA: 7.91/10

## ACHIEVEMENTS

- 1st Position at Codezilla by IEEE-MMMUT (500+ participants).
- 1st Position at Techazar in TechSrijan-2022 (500+ participants).
- Solved 500+ problems across LeetCode, GFG, CodeChef, and HackerRank.
